# ***NEBOSH Certificate in Fire Safety and Risk Management***

The NEBOSH Certificate in Fire Safety & Risk Management is aimed at managers and supervisory staff that need to ensure that their organisation meets its responsibilities under fire safety legislation. Courses leading to this qualification should equip holders to carry out a fire risk assessment and to identify what fire protective and preventative measures are required. It is therefore also suitable for people moving into fire safety adviser roles.

## **Entry Qualifications**

No formal qualifications are required but candidates must have a reasonable standard of written English.

## **Course Content**

The syllabus comprises two main units and a practical assessment. Unit NGC1 is a common unit that is shared with the NEBOSH General Certificate and the NEBOSH Construction Certificate. Holders of these qualifications are exempt from this unit.

NGC1 Management of health and safety  
FC1 Fire safety & risk management  
FC2 Fire safety practical application

The practical requires candidates to successfully carry out a fire risk assessment within a workplace of their choice. Candidates do not require supervision when carrying out the practical application, but the candidate must sign a declaration that the submission is their own work. The finished report is marked by ATM Safety & Environment and moderated by NEBOSH.
